

# WATER

**MLSA** WINTER 2011 Theme Semester

Ecology, human health, the global economy, the Great Lakes,  
cultural traditions, history, the arts, literature, chemistry,  
physics... **LIFE!**

Get involved!

*Join in the exploration and celebration of our most  
fundamental resource... **WATER!***

- ◆ Develop a new course or freshman seminar
- ◆ Put more water into an existing course
- ◆ Encourage your department to think water in lectures, seminars, or other activities
- ◆ Tell your friends about the Water Semester
- ◆ Attend the events

Creative new ideas are welcome!

Lectures, films, concerts, exhibitions, and competitions will explore how water is essential to life on Earth. Student engagement is a priority, including developing student awareness of the growing worldwide water crisis, with a special focus on local solutions and positive actions.
